The screenshot displays the MYCo Handbook customization interface. The main content area shows a theme titled "GB: Workplace Values Across Generations" for the "Baby Boomer" generation (60-78). The theme includes three sections: "Stereotypes", "Research", and "Strategy & Practical Advice".

Stereotypes: Baby Boomers are frequently depicted as excessively committed to their jobs, associating extended hours with loyalty and showing resistance to flexibility or change. This characterization shows them as inflexible traditionalists clinging to outdated ways. In truth, Boomers have experienced swift cultural and technological transformations and have consistently demonstrated their capacity to adjust to new circumstances when provided with respectful assistance.

Research: Studies indicate that Baby Boomers prioritize loyalty, respect, and acknowledgment. They perceive their work as a component of their personal identity and are driven by the desire to make significant contributions. They are inclined towards organized settings and value the trust placed in them to handle responsibilities. Research also reveals that they can adapt to digital transformation successfully, provided they receive clear instructions and adequate support systems.

Strategy & Practical Advice: To maintain the interest of Boomers, organizations ought to acknowledge their longstanding contributions and furnish structured training on new technologies. Engaging them in mentorship allows them to share their expertise and feel appreciated. Positions that highlight their institutional knowledge, strategic advisory roles, and recognition initiatives support ongoing motivation and inclusion.

The interface also features a sidebar on the left for selecting generations (Gen Z, Millennial, Gen X, Baby Boomer) and a right sidebar for the "Your Custom Handbook" with a list of themes and an "Export Handbook PDF" button. A "Good to know" tip at the bottom right states: "When you add content from a different theme, MyCo automatically includes the theme introduction."
